EVENT REPORT**

Name of Event: Innovative Technology for Rural Development in Maharashtra

Date of Event: 09 October 2016

Duration of Event: 01 day

Venue of Event: Daryapur, Dist. Amravati

Number of Participants: 14

Objectives:

Rural development is the process of improving the quality of life and economic well-being of people living relatively isolated and sparsely populated areas. The need for rural communities to approach development from a wider perspective has created more focus on a broad range of development goals rather than merely creating incentive for agriculture or resources based businesses. Education, entrepreneurship, physical infrastructure and social infrastructure all play an important role in developing rural regions.

Outcomes:

- Transformation of existing energy utilization pattern of conventional to renewable energy resources.
- Making available DAE technologies for rural development.
- Gain the latest information about state of the art renewable and nuclear technologies.
- Learn Social & economical aspects of renewable and nuclear energies implementation.
- Review the recent policy developments impacting the Indian renewable energy sector.
- Gain understanding of government policies and priorities.
- Achieve strategic and operational excellence to address the goal of advancing renewable energy.
- Participate in interactive panel discussion tackling some of the most pressing issue, facing the industry.
- Experience sharing through presentation and case studies.
- Interact and network with the stakeholders & policy makers.
- Opportunity to Display, Demonstrate and sale product by industries.

About the Event:

Event is organized by Gadgebaba Mandal, Daryapur, Dist. Amravati on State Level Working Model and Poster presentation Competition for Students.
